Project Title	Online Course Management System
Project Credits	3 Credits
Candidate	Mr.Tho Kongtuk 6405100001
Advisor	Mr.Narongrit Sukonthasing
Program	Bachelor of Science
Field of Study	Information Technology
Academic Year	2023

Adstract

This research project focuses on the design and development of a sophisticated online course management system tailored specifically for music schools. The primary objective is to create a system that streamlines the enrollment process, alleviates operational challenges within music schools, and enhances overall convenience for both users and administrators. The development utilizes Microsoft Visual Studio 2022 for programming, and Microsoft SQL Server 2019 for effective data handling within the system.
